Standard Conversion Instructions: Note number in the “Conversion Instruction Notes” column of this Change Summary and Conversion Instruction Guide refers to the standard instructions listed below. Notes are used singly or in combination to cover conversion instructions. However, written specific instructions may be added or substituted when a change requires special clarification.

NOTE	INSTRUCTIONS
1	Code deleted from Enlisted Classification Structure.
2	Code added to Enlisted Classification Structure.
3	Direct conversion actions: Automatically converts directly in Military Personnel Data System (MilPDS). Report on Individual Person (RIP) source document is provided. After all conversion actions are completed, Military Personnel Section (MPS) must update personnel into a valid manpower programming and execution system (MPES) position, when available.
4	No conversion action required.
5	Title change.
6	See Section I-B, Authorized Prefixes, of the AF Enlisted Classification Directory for an explanation of prefix award and deletion criteria.
7	Review and evaluation of an individual’s qualification are required before designating Specialty Experience Identifier (SEI). Manpower and Personnel representatives, with local functional help, will review authorized AFSC positions on unit manpower document (UMD) and designate SEI to appropriate positions.
8	<u>Indirect conversion actions:</u> a. Personnel. First AFSC listed under “New AFSC” column is the “preselect AFSC” that will be automatically selected and shown in preconversion listing available to MPSs no earlier than 45 days prior to the conversion date. MPSs, with the help of local functional representatives, will review and evaluate preselect preconversion to determine if (1) DAFSC/CAFSC match manpower position conversion, (2) CAFSC is at correct skill level, and (3) awarded AFSCs (P/2/3/4) are correct, according to individual’s qualification. More than one AFSC associated with this conversion may be awarded if individual qualifies based on background and experience. AFI 36-2101 applies. If review and evaluation finds preconversion preselect AFSCs are correct, MPSs will not change in MilPDS; if incorrect, MPSs must ensure that indirect conversion actions are appropriately updated post-conversion in MilPDS and source documents provided to the Airman and ARMS for file in his/her ARMS electronic record. For those Airmen not remaining in the preselect AFSC, MPSs must either prepare an AF Form 2096, <i>Classification/On-the-Job-Training Action</i>, documenting the correct indirect conversion AFSC information or edit the RIP produced after the conversion. After all conversion actions are completed, MPS must update personnel into a valid MPES position, when available. See AFCSM 36-699, volume 1, <i>Military Personnel Flight (MPF) Management and Military Personnel Data System (MilPDS) User Guidelines</i>, paragraph 5-2. b. Manpower. With the help of the functional manager, MAJCOM, and Field Operating Agency (FOA), manpower will determine UMD changes required to effect conversion and implement those changes in the MPES as soon as possible after notification by USAF Military Classification Development (HQ AFPC/DPSIDC) of approved indirect conversion but not later than 30 days prior to the conversion date. c. Pipeline Personnel. Pipeline personnel already on assignment as of effective date will convert as follows: For personnel with a report not later than date (RNLTD) within 120 days after the conversion effective date, Enlisted Assignments (HQ AFPC/DP2) will change projected AFSC in MilPDS to match position to which member will be assigned. On arrival, MPS will award Air Force Specialty Code (AFSC) coinciding with the position of assignment, unless previously awarded. Assignment of personnel with an RNLTD more than 120 days after conversion effective date will be reevaluated by HQ AFPC/DP2 and either confirmed, canceled, or diverted, based on post-conversion requirements at the tentative gaining unit and the individual’s qualifications for the AFSC in which he or she will be shipped.
9	MilPDS table changes required.
10	MPES table changes required.
